## ABOUT ME

My development philosophy is simple; create an effective and interactive learning environment and by this those who I lead will thrive. My goal is to assist the next generation in developing the capacity to think, to assess, to evaluate, to analyze, and to draw their own conclusions and interpretations to the puzzles that law enforcement presents. I have found that my excitement about the core concepts easily transfers to the next generation and by this I strive to instill the value that learning is a lifelong journey in which a person ought to see progress, achievement and development personally, professionally and academically.

## MY SKILLS

- \* Leadership Experience and Training
